The *International Economic Review* is a monthly staff publication of the Office of Economics, U.S. International Trade Commission. The opinions and conclusions it contains are those of the authors and do not necessarily reflect the views of the Commission or of any individual Commissioner. The *IER* is produced as part of the Commission's international trade monitoring program. Its purpose is to keep the Commission informed about significant developments in international economics and trade and to maintain the Commission's readiness to carry out its responsibility to provide technical information and advice on international trade matters to policy-makers in the Congress and the Executive branch. The *IER* is available to Government officials outside the Commission on a request basis. Inquiries or comment on items appearing in the *IER* may be made directly to the author or to:

About Chartbook

CHARTBOOK is published annually by the Office of Economics of the U.S. International Trade Commission to make available to the Congress, the Executive Branch, and the public information on the composition, value, and direction of U.S. merchandise trade with the world and its major trading partners for the previous five years.

This edition of CHARTBOOK contains information on U.S. trade with geographic regions and trade with individual countries for the years 1989-93. Data on the following geographic regions and individual countries are included in this edition.

Geographic regions	Individual countries, territories, and possessions		
• North America	• Canada	• Japan	• Colombia
• European Union	• Mexico	• China	• Venezuela
• Pacific Rim	• Germany	• Taiwan	• Switzerland
• Latin America	• United Kingdom	• South Korea	• Israel
• All other countries	• France	• Argentina	• India
	• Italy	• Brazil	• Saudi Arabia

Definitions

The data presented in CHARTBOOK includes trade in *merchandise* only. Trade in services is not included, except as noted.¹ This publication is prepared from data compiled from official statistics of the U.S. Department of Commerce contained in the CENSUS trade database,² unless otherwise noted. Imports are Census-basis³ imports for consumption at customs value. Exports are Census-basis domestic exports at f.a.s. value. All values are presented in billions of U.S. dollars except as noted.⁴ Because of numerical rounding (usually at the billions of dollars level), some totals

¹ One chart, "Comparison of the U.S. current account balance to the U.S. Federal budget deficit, 1970-93," on pp. 10-11, contains trade in both merchandise and services in the current account balance data.

² This database is maintained by the U.S. Department of Commerce, International Trade Administration, at the National Institutes of Health (NIH) Federal Data Processing Center. Since January 1, 1989, U.S. trade data have been collected on the basis of the product subheadings of the Harmonized Tariff Schedule of the United States (HTS).

³ U.S. merchandise foreign trade data are collected by the Customs Service and compiled and published by the Bureau of Census, and are referred to as Census-basis trade. Census-basis merchandise trade is adjusted by the Bureau of Economic Analysis (BEA) for inclusion in their Balance of Payments (BOP) statistics. These adjusted data are referred to as BOP-basis merchandise trade.

⁴ In the section, "U.S. trade with selected other countries," charts where data are broken out by product sector are small enough to require analysis in millions of dollars, rather than billions. In such cases, the charts are marked as valued in millions of dollars.

and percentages presented graphically may not equal those derived directly from data presented in appendixes A through C.

Trade data are presented according to broad product sector groupings: food, manufactured goods, fuel and raw materials, and all other goods. These groupings are based on the Standard International Trade Classification (SITC), revision 3. The following are the SITC section categories included within each product sector grouping.

Food	Manufactured goods
<ul style="list-style-type: none"> • Section 0 (food and live animals) • Section 1 (beverages and tobacco) • Section 4 (animal and vegetable oils) 	<ul style="list-style-type: none"> • Section 5 (chemicals) • Section 6 (basic manufactures) • Section 7 (machinery and transport equipment) • Section 8 (miscellaneous manufactures)
Fuel and raw materials	All other goods
<ul style="list-style-type: none"> • Section 2 (crude materials) • Section 3 (mineral fuels) 	<ul style="list-style-type: none"> • Section 9 (commodities not elsewhere classified)

Layout

The first section of CHARTBOOK is an overview of U.S. trade with the world, followed by sections concerning U.S. trade with four geographic regions and all other countries. Trade with four leading countries within each region is then presented.

Each regional section contains the following:

Number	Type of graphic	Data presented in graphic
1	Table	Leading U.S. exports and imports with respective region or partner, 1993
1	Bar graph	Share of total U.S. trade with respective region or partner, by product sector, 1993
